TREE BENEFITS AND USES

FARMER USES

Unknown

FARM SERVICES

Coffee Shade, **Carbon Capture**
Capture and storage of atmospheric carbon.

BIODIVERSITY BENEFITS

✔ **YES**

Attracts biological control agents, Attracts seed dispersers, Attracts pollinators. Provides food to hundreds of wildlife. Fruits are consumed by many birds and mammals species, and a variety of insects also visit its flowers and fruits. Having rubber trees in agricultural systems is essential to help maintain the functioning of the ecological processes that occur in the landscapes around farms.
