

TREE SPECIES (SCIENTIFIC NAME)

Melia azedarach

ENGLISH COMMON NAME

White Cedar

INDONESIAN COMMON NAME

Mindi, Marambung (Sumatra)

TREE FAMILY

MELIACEAE

AVERAGE LEAF SIZE (CM)

15-80cm × 2-10cm

Length Width

ELEVATIONAL RANGE (M)

0-1200m

TREE HEIGHT

LARGE (> 35M)

DISTRIBUTION

NATIVE TO INDONESIA

NATIVE TO

Region: Asia, Oceania

Cambodia, Laos, Papua New Guinea, Philippines, Thailand, Vietnam

Indonesia: Java, Lesser Sunda Islands, New Guinea, Sumatra

COFFEE AGROFORESTRY INFORMATION

TREE BENEFITS AND USES

FARMER USES

Food, Fuelwood, Lumber, Medicinal, Ornamental, Product

The tree produces resin, aqueous and alcoholic extracts of the leaves and seed reportedly control many insect, mite, and nematode pests (but contain toxic components so care is needed in their use), its various parts have antiparasitic and antimalarial properties and are used as laxatives, to induce vomiting, to stimulate menstrual discharge, and to treat skin diseases. It produces oil and sugar, and its wood, which can be sold in regional and national markets, is used to make agricultural implements, carts, tool handles, furniture, and is valued in construction due to its termite resistance.

FARM SERVICES

Nitrogen Fixation

BIODIVERSITY BENEFITS
