

TREE SPECIES (SCIENTIFIC NAME)	ENGLISH COMMON NAME
<i>Gigantochloa verticillata</i>	Whorled bamboo
	INDONESIAN COMMON NAME
	Bambu gombong

TREE FAMILY	AVERAGE LEAF SIZE (CM)	DISTRIBUTION
POACEAE	24-47cm × 3.5-7cm Length Width	 NATIVE TO INDONESIA
ELEVATIONAL RANGE (M)	TREE HEIGHT	NATIVE TO
0-1200m	MEDIUM (20-35M) 	Region: Asia Malaysia, Myanmar, Singapore, Thailand, Vietnam Indonesia: Borneo, Java, Sumatra

COFFEE AGROFORESTRY INFORMATION

COFFEE SYSTEM	COFFEE IMPACT	TREE MANAGEMENT
 ROBUSTA  ARABICA	✓ BENEFICIAL TO COFFEE	Only propagated by rhizome, culm or branch cuttings. Cuttings from flowering clumps should be avoided because they will start flowering soon after planting. Culm cuttings have a survival rate of nearly 100%. Plant at 8 m x 8 m. Grows best in areas with high rainfall. To promote regeneration, loosen and mulch the base of the harvested culms. Competes with coffee.
REGENERATION	CULTIVATION	
 REGENERATES NATURALLY	 PLANTED	

PREVALENCE
Unknown

TREE BENEFITS AND USES

FARMER USES	FARM SERVICES
  	Unknown
Food, Fuelwood, Lumber	Maintains water regulation and quantity.
The young shoots are eaten as a vegetable	
	BIODIVERSITY BENEFITS
	Unknown
