

TREE SPECIES (SCIENTIFIC NAME)

Citrus medica

ENGLISH COMMON NAME

Citron

INDONESIAN COMMON NAME

Jeruk sukade, Sitrun

TREE FAMILY

RUTACEAE

AVERAGE LEAF SIZE (CM)

12cm × **3-4cm**
Length Width

DISTRIBUTION

 **EXOTIC IN INDONESIA**

ELEVATIONAL RANGE (M)

0-1300m

TREE HEIGHT

SHRUB (1-10M)

NATIVE TO

Region: Asia
Myanmar

EXOTIC IN

SE Asia: Laos, Vietnam
Indonesia: Borneo, Java, Sumatra

COFFEE AGROFORESTRY INFORMATION

COFFEE SYSTEM

 **ROBUSTA**  **ARABICA**

COFFEE IMPACT

 **MAY COMPETE WITH COFFEE**

TREE MANAGEMENT

Regularly attacked by Citrus Greening Citrus Vascular Phloem Disease (CPVD), especially at lower altitudes (<1000 masl) but less affected by CVPD at higher altitudes (>1000 masl). Able to withstand dry periods and poor soil.

REGENERATION

Unknown

CULTIVATION

 **PLANTED**

PREVALENCE

 **COMMON IN COFFEE AGROFORESTRY**

TREE BENEFITS AND USES

FARMER USES

Medicinal, Ceremonial

Used in treatment of asthma, arthritis, headache, stomachache, intestinal parasites, and certain psychological distress (e.g. possession by evil spirits). Decoctions of the roots are reportedly used to treat respiratory problems and backache. Can be sold at local markets.
